Cost of the fire pump decided to be imported from Europe	
Various	

Allocated for the reparation of roads

Problems are created by people in the payment of the intestine, macadam, road and carriages taxes, taken on the basis of the Sanjak Administrative Council's decisions for the purpose of covering the necessary expenditures of the municipal office, and whose total amount is approximately made up of 400,000 piasters. A consultation was thereupon made; and in the telegram sent by the Ministry of Internal Affairs on 29 August 1908, it was ordered and notified that the specified taxes henceforth not be taken as it is not lawful to take any tax without an imperial decree. With the cut of the said taxes from 14 August 1908 onwards, annual incomes of the municipality decreased from 900,000 piasters to 500,000 piasters. There are macadam roads extending for 10 kilometers outside the city and there are averagely 80 active carriages on a daily basis, shuttling from Bab-al Halil to the Municipality Hospital and the company named Mea Şarim. The carriages have a high degree of passing through these roads and if they are not repaired every year, they will remain in a dilapidated state. If these roads outside the city walls, located in a place transformed into a developed kaza and ready for the passing of the whole people, making progress and thus gaining more significance than inside the kaza and for which the municipality is obliged to repair as they are considered among the town streets, are left without being repaired, it will be completely impossible to pass through them in winter due to mud and in summer due to dust. Furthermore, they will also lead to complaints from the people by giving damage to general health and eyes of passerby. It has thus been considered absolutely necessary and mandatory that the said roads be repaired. If the said taxes are not re-taken as was the case in the past or another income is procured in exchange for them, there would be no opportunity next year for the reparation of the specified roads and removal of water for the purpose of preventing dust in summer days. Moreover, it would disrupt the proper functioning of important works such as cleaning and lightening, leading to a cut in the salaries of the poor, to the closing down of the hospital and to the hindering of the access to important and beneficial materials, which are among the elements of prosperity. Hence, as our council might have further responsibilities and due to such inconveniences, it is appropriate to relegate the matter to the Sanjak Administrative Council for negotiating the issue before the convention of the Parliament and taking due action in respect thereof. The 23<sup>rd</sup> of Aylûl (1)324 (6<sup>th</sup> of October 1908).
